PROJECTS

MyPet – Full-Stack Web Application | HTML, CSS, Bootstrap, PHP **2024**

- Built a scalable petcare web application using HTML, CSS, JavaScript and PHP.
- A full stack web application designed to help pet owners manage and tracks their pet information.
- Developed user-friendly interface.
- Integrated SQL database to maintain pet records and user data.

FYPP – Full-Stack Web Application | MongoDB, Express.js, React js, Node.js, Tailwind CSS **2025**

- Built a platform connecting clients and photographers using category filters and interactive live galleries.
- Engineered a secure session-booking system featuring strict local-timezone validation and direct messaging.
- Implemented secure authentication with custom, distinct dashboards for Clients, Photographers, and Admins.
- Developed a comprehensive admin panel to oversee user accounts, moderate profiles, and manage support tickets.

GRIP-IT – Bike Accessories E-commerce Platform | React.js **2026**

- Built a responsive e-commerce SPA for bike accessories using React.js and React Router.
- Managed state and data persistence for carts and user sessions utilizing browser LocalStorage.
- Developed an Admin Dashboard with role-based access to manage users and orders, and update shipping statuses.
- Created a dynamic checkout system supporting simulated multi-payment options (UPI, Card, COD).
